SUMMARY

A highly motivated and results-driven software developer with a passion for creating innovative and user-friendly technology solutions. Possessing a solid educational foundation and practical experience in cross platform development. Committed to delivering quality results and continuously expanding technical skills to stay ahead of the curve. Eager to take on new challenges and contribute to the success of a dynamic organization.

PROJECT EXPERIENCE

Chat Room

Software developer

- Developed a real-time chat platform for group communication.
- Created an intuitive UI for easy navigation.
- Utilized React and Firebase for fast and reliable data storage and retrieval.
- Integrated Github for version control and collaboration.
- Tested for performance and user experience.

Hotel Beach Resort

Software developer

- Built a full-service holiday lodging website with React.
- Designed a visually appealing and responsive UI.
- Implemented functionalities such as booking and payment processing.
- Utilized Git and Github for version control and collaboration.
- Deployed to Netlify for seamless access and maintenance.

Timeless Tour

Software developer

- Developed a website showcasing Africa's rich culture and heritage.
- Created an attractive and easy-to-use UI.
- Implemented dynamic content up and social media integration.
- Utilized Git and Github for version control and collaboration.
- Deployed to Netlify for seamless access and maintenance.

Krypto

Software developer

- Built a decentralized web page utilizing smart contracts.
- Implemented secure and efficient data storage and retrieval mechanisms.
- Designed a user-friendly UI for easy navigation.
- Utilized Git and Github for version control and collaboration.
- Tested for performance and security.

Covid-19 Tracker

Software developer

- Implemented a web page displaying up-to-date information on the coronavirus (COVID-19) outbreak.
- Designed an attractive and easy-to-use UI.

- Utilized APIs for real-time data up and visualization.
- Implemented functionalities such as tracking and prediction analysis.
- Deployed to Netlify for seamless access and maintenance.

LEADERSHIP EXPERIENCE

Team at Codetrain

Software developer

- Strategic Planning and Execution: Demonstrated expertise in defining and executing the team's strategic goals, using data-driven methods and effective decision-making.
- Team Management: Proven ability to lead and motivate cross-functional teams to achieve project milestones and deliverables. Managed team workload and resources to ensure optimal performance and job satisfaction.
- Agile Methodologies: Adept at using Agile methodologies to manage software development projects and provide regular progress reports to stakeholders.
- Communication and Collaboration: Strong interpersonal and communication skills, fostering an environment of collaboration and open communication within the team.
- Technical Knowledge: Extensive technical knowledge in software development and a strong understanding of current technology trends, allowing me to provide guidance and direction to the team.

EDUCATION

Codetrain

Software Development/Certificate   April, 2022

SKILLS & INTERESTS

Skills:

- Programming languages: JavaScript
- Frameworks: React, React-Native
- Databases: Node, MongoDB, ExpressJs
- Operating Systems: Windows, iOS

Interests: As a software developer, I am interested in exploring new and emerging technologies in the software development industry, particularly in areas such as artificial intelligence, machine learning, and web development. Outside of work, I enjoy staying up to date with industry trends and advancements through attending workshops, conferences and reading relevant articles and books. In my free time, I enjoy playing basketball, learning new programming languages, and practicing photography.
